

B+W SLIM Filters (Wide Angle Filters)

45

(Top photo): B+W SLIM FILTERS
The filter mount is 3 mm wide and will not vignette on focal lengths as short as 17mm.

(Bottom photo):
Standard filter mount for camera lenses with a focal length greater than 35mm.

B+W SLIM FILTERS

The B+W SLIM FILTERS (for Wide-Angle Lenses) are only 3 mm thick. And, they do not have a front thread. The SLIM Polarizer Filters are only 5mm thick. B+W SLIM filters will not vignette even with extreme wide-angle lenses as short as 17mm (35mm format). SLIM Circular Polarizer Filters are available in sizes from 49mm to 77mm, either uncoated or with MRC Coating; The 82mm size is available only uncoated. SLIM Filters are available from 49 to 105mm with single layer coating or with MRC coating. The B+W SLIM Filters set themselves apart from those of other manufacturers by virtue of their exceptional mechanical and optical qualities, because they are attached with reliable threaded rings which guarantee absolute rigidity and continuing stability.

Exclusively from B+W: Kasemann Polarizer Filters in the super-thin SLIM mount.

The unique B+W Kasemann Polarizer Filters, known for their top optical quality, are now available in the 5mm, super-thin SLIM mounts.

SLIM mount filter types available from B+W: UV, Skylight, Polarizer filters, filters for black/white photography, conversion filters, infrared filters, Redhancers, Kasemann Polarizer filters.
